Re: Lease by Application/NEICO Right of Way

Dear Mr. Parker,

In regards to the our Lease by Application (LBA) area and the additional unleased federal coal reserves to the north of the LBA that are in potential conflict with Nevada Electric Investment Company's (NEICO) application for a Right of Way (ROW) to their existing State Lease, I would like to go on record as to have no opposition to the conditional granting of the ROW to NEICO.

We feel that the ROW should be conditional upon a firm commitment by NEICO to provide the funds for construction and maintenance of longterm access, in the unlikely event it is needed, from both our LBA as well as a crossing from the piece of unleased federal land located between and contiguous to both the LBA area and Genwal.

We feel a crossing is both technically and practically feasible in light of the limited reserves at the Genwal mine and our and/or other third party's desire to have access in the future.

If you should have any further questions or comments please feel free to contact me at the above Price address or phone number.

Sincerely yours,

Andrew C. King
Vice President
